- 05 The villas - two homes, one standard.
- 06 Layout & flow.
- 07 Facilities & amenities.
- 08 The investment case & returns.
- 09 Ownership, security & the four-step path.
- 10 Mission, team & community.

a note from the developer

Welcome to Guri Escapes Pongwe.

Pongwe Villas is a premium villa project built to blend modern architectural calm with Zanzibar's rich coastal heritage. Our intent is simple: to craft a small number of considered spaces that offer comfort, privacy and genuine investment value, whether you are creating a family haven or building an income-producing asset on one of the most compelling coastlines in East Africa.

Everything here is designed to feel like the first deep breath on arrival unhurried, natural and quietly luxurious. We would be glad to welcome you to it.

the opportunity

Where comfort meets nature.

Pongwe Villas is a pair of contemporary two-bedroom villas on the quiet east coast of Unguja, each with a private pool, a makuti-thatched roof and generous walled grounds. They are designed to feel like the first deep breath on arrival: unhurried, natural and quietly luxurious.

For the investor, they are something more disciplined: hard-currency, tourism-led assets in the single best-yielding residential market in East Africa, structured for ownership by foreign buyers and built to perform from day one.

Project gross yield 18%, net 15% after ~20% operating expenses. Wider Zanzibar villa market is achieving 18-22% (RE/MAX Tanzania 2025/6). Returns vary with unit, operations and season.

the opportunity

Own a private pool villa on Zanzibar's calm east coast

Income while you're away, Paradise when you're here. Two design-led, fully managed villas in Pongwe, hands off returns & a lifetime of slow island mornings.

From USD \$90,000 Per villa Leashold

Why Pongwe, why now.

Pongwe is a tranquil coastal village on Zanzibar's eastern shore, renowned for pristine white-sand beaches, a calm reef-sheltered lagoon and a serene pace well away from the busier tourist zones. It offers a rare combination: a true escape for those seeking peace and privacy, yet well-connected to Stone Town and the island's major attractions, ensuring both exclusivity and convenience.

Zanzibar is the headline performer in the region's property market. Boutique villas and resort residences are achieving the highest yields in Tanzania and East Africa, occupancy sits around 65% and climbing, and land values are projected to rise sharply as new air routes and submarine power cables to the island complete.

THE MACRO CASE, IN BRIEF

- Yield leadership -** Zanzibar villas yield 18–22%, best-in-region, vs 8–12% on the mainland.
- Appreciation -** Land projected to appreciate 30–40% in 2026 as infrastructure lands.
- Demand -** Tourist arrivals on track to surpass 1 million by 2026.
- Currency hedge -** Revenues modelled in USD, natural hedge against shilling movement.

In short: this is a window. Early, patient owners secure premium assets before the appreciation wave and earn a strong income while they wait.

Coastal Bali meets Zanzibar.

The villas are a deliberate fusion: the laid-back luxury of the Balinese villa, organic materials, open floor plans, an easy flow between inside and out, married to the craft and heritage of the Swahili coast. The result is a home that feels both worldly and rooted in place.

Organic materials

Teak, coconut and mango wood, rattan, woven sisal and seagrass, warm, tactile, durable in the climate.

Swahili craft

Carved detailing, lime-plaster finishes, coral-stone texture and brass lantern light, made with local artisans.

Indoor-outdoor living

Full-height sliding glass dissolves the lounge into the pool terrace and garden, the Balinese way.

Calm, neutral palette

Coral-stone cream, sand and tropical green let the natural textures, not ornament, carry the room.

This fusion is what differentiates the asset. A well-executed Balinese–Zanzibari blend appeals directly to high-end vacationers and discerning buyers, and its timeless palette resists dating — protecting both rental appeal and resale value.

Two villas. One standard.

Each villa is a single-story, open-plan home of roughly 150 m² under roof, set within its own walled plot of about 1,100 m². The two plots Site A and Site B are near identical mirror layouts, ideal for a buyer taking one, or an investor acquiring both as a managed micro-collection.

Villa A

Villa B

Feature	Specification
Configuration	2 bedrooms (both with pool and garden access), open-plan lounge & kitchen
Built-up area	≈150 m ² under roof, single storey
Plot size	≈ 1,100 m ² walled, private — Site A 1,107 m ² / Site B 1,101 m ²
Pool	Private swimming pool per villa, sun-deck terrace
Roof	Makuti-style thatch on treated timber, authentic, cooling
Walls	230 mm rendered block, off-white weather-guard finish
Glazing	Full-height sliding aluminium/wooden-framed glass to the garden
Plot coverage	13%- generous open space, room to breathe
Services	Genset room, septic & soakaway, parking on plot

The material language is deliberately Zanzibari and deliberately calm — coral-stone cream, teak and woven textures, deep tropical green. Nothing loud, nothing ornate; less, but better.

layout & flow

Designed around the pool.

The plan opens. A long lounge and kitchen run the width of the villa and dissolve into the terrace through full-height sliding glass, so the pool and garden read as another room. The two bedrooms sit quietly to one side — private, cross-ventilated, each with its own outlook.

Room	Area	Description
Lounge	42m ²	Open-plan, glazed to terrace & pool
Kitchen / dining	31m ²	Island, integrated, opens to lounge
Bedroom 01	17m ²	Pool- and garden-facing, quiet wing
Bedroom 02	17m ²	Pool- and garden-facing, quiet wing
W.C / bath	12m ²	Natural finishes, stone detail
Terrace & pool deck	-	Wraps the living side of the villa

High ceilings, shaded verandas and cross-ventilation keep the villa cool with minimal reliance on air-conditioning — lower running costs, and a more comfortable, more sellable guest experience.

Considered, not crowded.

Every villa is specified to earn its place at the top of Pongwe's rental market and to feel like a private retreat the moment you arrive.

Private pool

A swimming pool per villa with a sun-deck terrace and a view over the tropical garden.

Open-plan interiors

Light-filled living with natural cross-ventilation throughout.

Private gardens

Lush tropical landscaping for privacy and a sense of calm.

Eco features

Solar-powered water heating and energy-efficient systems, lower running costs.

Outdoor living

A shaded gazebo and BBQ station for unhurried evenings outside.

Modern kitchen

Fully fitted with premium appliances and elegant, restrained finishes.

Secure parking

On-plot parking, walled and gated grounds.

Back-up services

Genset room, water store and septic / soakaway on plot.

the investment case

How it pays.

Pongwe villas are positioned as premium short-stay assets. The format that earns the top of Zanzibar's yield range. The project is underwritten to the figures below; the wider market context sits alongside for reference.

18- 22%

ROI POTENTIAL
TARGET GROSS YIELDED

30-40%

LAND APPRECIATION

15%

NET YIELD AFTER COST

Why the villa format wins here

-  **Yield.** Underwritten at 18-22% gross / 15% net; the wider market runs 18-22% well above mainland housing at 8-12%.
-  **Off-plan.** Buying off-plan captures launch pricing and a say in finishes, with payments spread over construction.
-  **Demand.** Private pool, privacy and design are exactly what couples, honeymooners and remote professionals pay a premium for.
-  **Scale.** Two near-identical villas run as one managed pair shared operations lower the cost of every booking.
-  **Appreciation.** Land projected to climb 30-40% as air access and power complete income now, capital upside on top.
-  **Residency.** A purchase at or above USD 100k in an approved structure can support a Zanzibar investment residence permit.

the investment case

We handle the guests. You receive the returns.

Your villa is run under a professional hospitality model - so ownership stays effortless and income stays hands-off.

Hotel-Grade Operations

Professional, hotel-style operations and attentive guest service from arrival to checkout.

Reservations & Revenue

Centralised reservations, marketing & revenue management that keep occupancy high year round

Maintenance & Care

Maintenance, housekeeping & quality control, the villa stays guest ready always

The tourist arrivals are on track to surpass 1 million tourists by 2026. All villas earn in USD, a natural hedge against currency movement.

the investment case

Rental Income & Return on Investment

Modeled per villa (USD 90,000 buy-in) —conservative case vs. Zanzibar's island-wide 65% occupancy average.

Scenario	Nightly Rate	Gross/month	Net/month	Net/year	Payback (villa)	Payback (+setup)
Conservative (our model) 13 nights/mo - ~43% occupancy	\$150	\$1,950	\$1,560	\$18,720	4.8 yrs	5.6 yrs
Conservative (our model) 13 nights/mo - ~43% occupancy	\$180	\$2,340	\$1,872	\$22,464	4.0 yrs	4.7 yrs
Island-average occupancy 65% occupancy - ~19.5 nights/mo	\$150	\$2,925	\$2,340	\$28,080	3.2 yrs	3.7 yrs
Island-average occupancy 65% occupancy - ~19.5 nights/mo	\$180	\$3,510	\$2,808	\$33,696	2.7 yrs	3.1 yrs

Net figures assume a 20% all-in deduction for management commission and operating costs. Payback (+setup) includes the \$15,000 furniture & appliance package on top of the \$90,000 villa price.

Our published figures use the conservative case—13 nights a month. At the island's 65% average occupancy, the same villa could payback in as little as 3.6 years instead of 6.4— the conservative model is a floor, not a forecast.

ownership & security

Owned safely, by design.

Foreigners do not own land outright in Zanzibar — they hold long leases, most straight forwardly inside government-approved Zanzibar Commission of Tourism (ZCT) Land lease structure. Guri Escapes Pongwe is set up to put buyers on that secure, recognized footing from the start.

Item	What it means for you
Tenure	Long leasehold, up to 99 years — the standard route for foreign buyers
Approval route	Zanzibar Commission of Tourism (ZCT) Land lease structure; clean title / master lease
Residency	Qualifying investment (USD 100k+) can support a renewable residence permit
Your team	Independent lawyer + quantity surveyor
Protection	Investment law guarantees against expropriation without compensation; ICSID arbitration rights

The path to ownership

01 Reserve

Secure your villa with a refundable booking fee of 10% of the villa price while legal due diligence runs.

02 Purchase agreement

Sign the contract and place a 20% deposit, confirming availability and locking today's price.

03 Build to milestones

Flexible instalments release against certified construction milestones over the build period.

04 Ownership transfer

Receive ownership documents on full payment and completion; register the lease and, if eligible, apply for residency.

mission, team & community

Built well, and built to give back.

Mission

To create sustainable, refined villas in Zanzibar that integrate modern living with local heritage, building trust and lasting value for our owners.

Vision

To be a benchmark for quality, design and sustainable development on the Zanzibar coast and beyond.

The professional team

Architecture

Designs that blend Swahili tradition with modern, climate-led luxury.

Engineering & PM

Quality construction and on-programme delivery, milestone by milestone.

Interiors

Coastal Bali-inspired interiors in premium, locally-sourced finishes.

Sales & legal

Guidance through purchase, ownership structure and residency.

Local & community benefit

Jobs. Employment for local artisans, craftsmen and laborers through construction.

Economy. Materials and services sourced locally, supporting small businesses and the wider economy.

Skills. Skill development through collaboration with local workers on modern build methods.

Sustainability. Sustainable, eco-conscious construction — solar hot water, natural cooling, breathable lime finishes.

A word on patience.

Tanzania rewards the prepared. Permits, utilities and imports can take longer than expected, so we build a 20–30% time buffer into every programme and work only through official channels and reputable advisors. The reward for that discipline is one of the most compelling frontier markets in Africa today.

This document is for information and marketing only and is not a binding offer. Areas and finishes follow the architectural concept and may be refined in final design. Yield, occupancy and appreciation figures are directional — the 18% gross / 15% net figures are the project's own estimates and the 18–22% range is drawn from RE/MAX Tanzania market reporting — and are not a guarantee of individual return
